- **Languages:** Dart, C, SQL, HTML5, CSS3
 - **Front-End:** Flutter, Kotlin Android
 - **State Management:** Riverpod, Provider
 - **Back-End & Databases:** Supabase, PostgreSQL, SQLite, RESTful APIs, GraphQL
 - **Tools:** Git, GitHub, Postman, App Store Connect, Google Play Console
-

PROJECTS

Hostpro – Event Workforce App

- Built a Flutter app connecting individuals with part-time work at events—concerts, corporate gatherings, exhibitions, and celebrations.
- Features include browsing upcoming events, applying for positions matching user skills, and a unified event work management dashboard.

Nyburns – Hyperlocal Social Media Platform

- Designed for the Indian market, connecting users within geographic communities from village to state level via pre-segmented, location-aware feeds.
- Supports 12+ Indian languages and local dialects, removing communication barriers and emphasizing social connectivity over global reach.
